## OUR DAIRY

All our dairy products are made with milk sourced exclusively from pedigree Jersey cows on the island of Jersey. Our cows produce milk that is naturally lower in saturated fats compared to milk from other breeds and has up to 20% higher protein and calcium.

Our Jersey cows have a free range and natural lifestyle, which contributes to the quality of our milk.

The island's herds of pedigree Jersey cows are fortunate in maintaining an outstandingly high herd health status and we genuinely believe our cows to be some of the healthiest not just in Europe, but Worldwide.
